Standard service rate in the Denver Metro Area is \$150.00 per appliance and includes a full diagnostic, service, clean, tune, inspection, any necessary repairs and/or adjustments as well as a preventative maintenance check. If the **fireplace is multi-sided, there would be an additional \$60.00 fee added to the standard rate to service** that individual appliance. The only thing not included would be any replacement parts, if parts are needed.

We carry a wide variety of universal parts in our trucks, but if we cannot fix the unit because we do not carry the special order parts we **charge \$95.00 for** a return trip to install the special order part. If you are located outside the Metro area, then the return fee to install the special order part would be \$95.00. Our goal is to fix the fireplace/grill in one trip but due to the amount of different models in the field, it is not possible to carry every possible replacement part.
